See the email below from Tom. Very nice praise coming from the AA for ORD. Excellent work all! And please share with others I've missed.

Thanks Shaun. Just FYI. Just got off call with our top risk assessment folks who have reassured me of the good work and sound approach of Deb and your science folks.

Shaun,

ATSDR recommends the following recommendations are prudent public health practices regarding contact with sediments and surface water:

- 1) Don't drink untreated water from the river.
- 2) Wash hands thoroughly with soap and water after contact with the sediment and surface water.
- 3) Avoid contact in areas where there is visible discoloration in sediment or river water.
- 4) Wash clothes after contact with sediments and surface water.

Thank you,

Patrick Breysse

Director

NCEH/ATSDR
